

Snap Server 210 -- up to 1TB on the desktop

19th March 2007

(Extract)

Unlike the big rack mounted enterprise NAS systems, Adaptec's Snap brand has mostly focussed on the smaller end of town. This is a new product in the lineup and comes in a desktop design, with either 500GB or 1TB of networked storage. Key here is the idea that these boxes aren't as difficult to get working as some enterprise type products -- you probably don't have the time or money to spend on specialist IT workers. Adaptec is at great pains to point out the graphical setup screens courtesy of the GuardianOS. This particular model has RAID 0 and 1 data protection and introduces "unified file and block services" to Adaptec's small business line.

- RRP \$2,152 (500GB) including software **Company** [Adaptec](#)
